

Research Summary

Project

Color Psychology Study in UI/UX Design

Purpose

Understand how colors influence emotions, perception, decision-making, and user experience.

Objectives

- Study color psychology.
- Analyze brand colors.
- Explore accessibility.
- Recommend best practices.

Methodology

- Literature review
- Brand analysis
- UI observation
- User survey

Key Findings

- Blue builds trust.
- Green represents growth.
- Red attracts attention.
- High contrast improves readability.
- Consistent palettes improve usability.

Recommendations

- Follow WCAG.
- Use consistent palettes.
- Test with users.
- Support dark mode.

Conclusion

Color psychology plays a vital role in creating engaging, accessible, and user-friendly interfaces.
